

Diablo Series

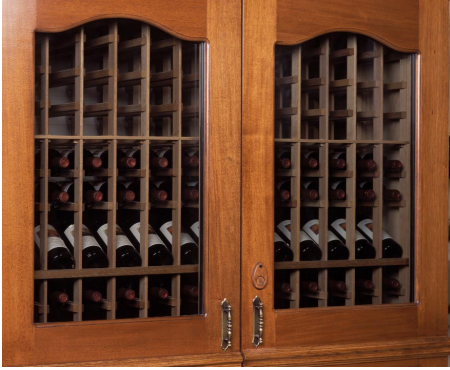

By

Vinotheque Wine Cellars

The Diablo series cabinet is the first of many new designs being introduced by Vinotheque. We have taken our existing line of cabinets and enhanced their aesthetic beauty. Diablo incorporates a new glass style door with a series of mouldings to create this new and pleasing look for the discriminating wine collector. Offered in any of our existing cabinet sizes with a multitude of finishing options. The Diablo series will enhance the art of wine collecting.

Options:

Display racking: The pride of collecting those special wines can be admired without the need to handle each bottle individually. Display racking offers the collector the opportunity to display a one row of bottles horizontally across the cabinet.

Sliding shelves: This new option offers both ease of access and display capability. Sliding shelves are designed to cradle each bottle individually while offering convenient access to any wine in the cabinet. The shelves also allow collections to be consolidated and displayed in various groups within the cabinet. **Note: Sliding shelves do utilize more space and therefore diminish the overall capacity by approximately 30%.**

Birdseye inlay: This feature offers a Birds eye maple wood inlay in the bottom door panels, side panels and on the cove crown mouldings. This unique and exquisite wood option will further enhance the cabinets beauty. **We recommend staining the inlay a different color in order to intensify the effect.**

Shown above: 320 QT Series cabinet with optional arched base moulding and coved crown moulding.
