

# Display Cabinet Series

By

Vinotheque Wine Cellars

Designed to add a new dimension to wine cabinets, our new Display Series offers matching display cabinetry on each side of the wine storage cabinet. The display series provides a means to display wine accessories and books while softening the overall large depth inherent to double deep bottle storage. Display series is offered in two different dimensions and for all sizes of cabinets. Optional molding is available as well.

## Options:

Display series is available in two dimensions.

**12" wide x 18" deep:** Designed for use with smaller cabinets, the 12" units offer the enhancement of bookcases while remaining subtle.

**18" wide x 18" deep:** Designed for larger cabinets displayed along single wall, this size utilizes the larger depth of the cabinet while matching proportionally to larger cabinets

**Full Height:** You may choose to have the display cabinetry match the existing height of the wine storage cabinet by keeping the height of each cabinet the same with the wine storage unit.

**Recessed Height:** You may choose to have the display cabinetry recessed a few inches lower than the existing height of the wine storage cabinet. (recommended for crown molding option).

**Moulding Option:** You may elect to have the display cabinetry fitted with our base and crown moulding to match our signature series cabinetry.

*Note: display cabinets require minor assembly upon installation. Arrangements for assembly may be made with moving company but will require an additional charge.*
