*has come to*

## *Vinotheque Wine Cellars*

Vinothèque Wine cellars is proud to offer the look of stainless steel to our fine line of cabinet products. As your collection grows, having your Vinothèque cabinet in the kitchen allows you to keep the wine where it is a part of your everyday lifestyle and food preparation. Vinothèque cabinets are designed to maximize bottle capacity while minimizing the overall space of the cabinet. Our front venting option allows our units to be built into the existing cabinetry while maintaining the ideal temperature and humidity for the aging of fine wines. Originally designed for the kitchen, the look and feel of stainless steel enhances the lifestyle in any environment.
